

Technical drawing of a hexagonal nut with a conical top. The drawing includes a side view, a top view, and a cross-section. The side view shows a hexagonal base with a conical top. The top view shows a hexagon with a central circular hole. The cross-section shows the internal thread. Dimensions are labeled: H (height), H1 (height of the hexagonal part), R (radius of the conical top), R1 (radius of the hexagonal part), D (outer diameter), d (inner diameter), and L (length of the thread). The material is specified as 6061-T6 aluminum.

Technical drawing of a hexagonal nut (Гайка) showing side and top views with dimensions. The side view shows a hexagonal base with a central hole, a flange with a raised edge, and a threaded section. Dimensions include: total height 40, flange height 10, flange outer diameter 30, flange inner diameter 10, base outer diameter 30, base inner diameter 10, and thread pitch 2. The top view shows a regular hexagon with an inscribed circle of diameter 30 and an outer circle of diameter 30. A detail view of the thread shows a pitch of 2 and a thread angle of 60 degrees.
