

Technical drawing of a mechanical part in cross-section. The part has a total length of 65 and a total outer diameter of 42. It features a central bore with a diameter of 36 and a threaded section of M16. The left end has a flange with a diameter of 55 and a thickness of 11. The right end has a flange with a diameter of 32 and a thickness of 10. A fillet with a radius of 15 is shown on the left side. The drawing includes various dimension lines and angles, such as 56 degrees and 112 degrees.
