

The diagram illustrates the construction of the intersection of two planes in descriptive geometry. It is divided into two main parts by a horizontal line representing the ground line.

**Top Part (Vertical Projection):**

- A plane  $K''$  is shown as a rectangle with vertices  $A''$ ,  $B''$ ,  $C''$ , and  $D''$ . Its front edge is  $A''B''$ , and its back edge is  $C''D''$ . The top edge is  $C''B''$ , and the bottom edge is  $A''D''$ .
- A plane  $T''$  is shown as a parallelogram with vertices  $L''$ ,  $M''$ ,  $N''$ , and  $O''$ . Its front edge is  $L''M''$ , and its back edge is  $N''O''$ . The top edge is  $O''L''$ , and the bottom edge is  $M''N''$ .
- The intersection of the two planes is found by projecting the intersection of their edges. The intersection point is labeled  $1''$ .
- Other points labeled include  $2''$ ,  $3''$ ,  $4''$ ,  $5''$ ,  $6''$ ,  $7''$ ,  $8''$ ,  $9''$ ,  $10''$ ,  $11''$ ,  $12''$ ,  $13''$ ,  $14''$ ,  $15''$ ,  $16''$ ,  $17''$ ,  $18''$ ,  $19''$ ,  $20''$ ,  $21''$ ,  $22''$ ,  $23''$ ,  $24''$ ,  $25''$ ,  $26''$ ,  $27''$ ,  $28''$ ,  $29''$ ,  $30''$ ,  $31''$ ,  $32''$ ,  $33''$ ,  $34''$ ,  $35''$ ,  $36''$ ,  $37''$ ,  $38''$ ,  $39''$ ,  $40''$ ,  $41''$ ,  $42''$ ,  $43''$ ,  $44''$ ,  $45''$ ,  $46''$ ,  $47''$ ,  $48''$ ,  $49''$ ,  $50''$ ,  $51''$ ,  $52''$ ,  $53''$ ,  $54''$ ,  $55''$ ,  $56''$ ,  $57''$ ,  $58''$ ,  $59''$ ,  $60''$ ,  $61''$ ,  $62''$ ,  $63''$ ,  $64''$ ,  $65''$ ,  $66''$ ,  $67''$ ,  $68''$ ,  $69''$ ,  $70''$ ,  $71''$ ,  $72''$ ,  $73''$ ,  $74''$ ,  $75''$ ,  $76''$ ,  $77''$ ,  $78''$ ,  $79''$ ,  $80''$ ,  $81''$ ,  $82''$ ,  $83''$ ,  $84''$ ,  $85''$ ,  $86''$ ,  $87''$ ,  $88''$ ,  $89''$ ,  $90''$ ,  $91''$ ,  $92''$ ,  $93''$ ,  $94''$ ,  $95''$ ,  $96''$ ,  $97''$ ,  $98''$ ,  $99''$ ,  $100''$ .

**Bottom Part (Horizontal Projection):**

- A plane  $K'$  is shown as a rectangle with vertices  $A'$ ,  $B'$ ,  $C'$ , and  $D'$ . Its front edge is  $A'B'$ , and its back edge is  $C'D'$ . The top edge is  $C'B'$ , and the bottom edge is  $A'D'$ .
- A plane  $T'$  is shown as a parallelogram with vertices  $L'$ ,  $M'$ ,  $N'$ , and  $O'$ . Its front edge is  $L'M'$ , and its back edge is  $N'O'$ . The top edge is  $O'L'$ , and the bottom edge is  $M'N'$ .
- The intersection of the two planes is found by projecting the intersection of their edges. The intersection point is labeled  $1'$ .
- Other points labeled include  $2'$ ,  $3'$ ,  $4'$ ,  $5'$ ,  $6'$ ,  $7'$ ,  $8'$ ,  $9'$ ,  $10'$ ,  $11'$ ,  $12'$ ,  $13'$ ,  $14'$ ,  $15'$ ,  $16'$ ,  $17'$ ,  $18'$ ,  $19'$ ,  $20'$ ,  $21'$ ,  $22'$ ,  $23'$ ,  $24'$ ,  $25'$ ,  $26'$ ,  $27'$ ,  $28'$ ,  $29'$ ,  $30'$ ,  $31'$ ,  $32'$ ,  $33'$ ,  $34'$ ,  $35'$ ,  $36'$ ,  $37'$ ,  $38'$ ,  $39'$ ,  $40'$ ,  $41'$ ,  $42'$ ,  $43'$ ,  $44'$ ,  $45'$ ,  $46'$ ,  $47'$ ,  $48'$ ,  $49'$ ,  $50'$ ,  $51'$ ,  $52'$ ,  $53'$ ,  $54'$ ,  $55'$ ,  $56'$ ,  $57'$ ,  $58'$ ,  $59'$ ,  $60'$ ,  $61'$ ,  $62'$ ,  $63'$ ,  $64'$ ,  $65'$ ,  $66'$ ,  $67'$ ,  $68'$ ,  $69'$ ,  $70'$ ,  $71'$ ,  $72'$ ,  $73'$ ,  $74'$ ,  $75'$ ,  $76'$ ,  $77'$ ,  $78'$ ,  $79'$ ,  $80'$ ,  $81'$ ,  $82'$ ,  $83'$ ,  $84'$ ,  $85'$ ,  $86'$ ,  $87'$ ,  $88'$ ,  $89'$ ,  $90'$ ,  $91'$ ,  $92'$ ,  $93'$ ,  $94'$ ,  $95'$ ,  $96'$ ,  $97'$ ,  $98'$ ,  $99'$ ,  $100'$ .
