

The diagram illustrates the intersection of two planes, π' and π'' , in a two-view projection system. The horizontal axis is labeled π' and the vertical axis is labeled π'' . The intersection line is labeled l . The intersection point is labeled B . The intersection line is labeled l . The intersection point is labeled B . The intersection line is labeled l . The intersection point is labeled B .

A right-angled triangle is shown with a horizontal base and a vertical side. The vertex at the top-right corner is labeled 'q', and the vertex at the bottom-left corner is labeled 'l'. The right angle is at the top-left corner.
